

SG-SST normative RAG architecture

Runtime technologies, AI models, retrieval infrastructure, communication boundaries and offline index construction.

OFFLINE CORPUS PIPELINE · LOCAL

OFFLINE

Corpus transformation and index construction

1 · DOCX corpus

data/raw/*.docx

SG-SST legal sources

2 · Ingestion

Pandocpy pandoc

DOCX → Markdown · tables extracted

3 · Clean & chunk

Parent chunks + regex-constrained semantic child chunks

4 · Table documents

Markdown + JSONL

Structured table documents

5 · Build indexes

Qwen → ChromaDB

BM25S → sparse index

Parent-document lookup

data/processed/ · chunks · tables · table_documents.jsonl · ChromaDB · BM25S index · parents.jsonl
